# Thisis climate change

Addressing climate change is essential for the future of our city, and has rightly been prioritised by residents and Councillors.

The challenge is no longer technical - this is an emotional, social and economic journey. With economic implications that will arrive well before sea level rise.

The Council has a robust climate response **strategy**, which is evidence based, impactful and rigorous. Importantly, it is focused on where we have power to make a difference.

### Our main emission sources

#### Drivers of economic transition

Consumers wanting options

Insurance retreat

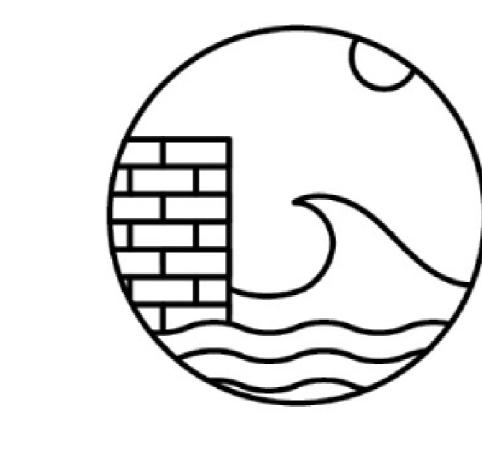

Suppliers seeking solutions

Investors looking to avoid risk

Increasing price of fuel The 2024 Long-term Plan will cost-efficiently deliver on the big system shifts that matter the most and are central to the Council's mahi. Our strongest contribution to a low-carbon capital is investing in infrastructure changes to the transport and waste networks, and using our city planning capabilities.

Climate & Sustainability Fund Te Aro Zero Waste hub

**EV First Fleet** Electric heating of pools Green Network Plan

Car share, micro-mobility, and EV charger providers

### Delivering on the 2024 Long-term Plan

#### Collaborate with our communities to mitigate and adapt to climate change

Plan

The Climate Change Response business unit leads community climate action, delivering on this 2024 Long-term Plan priority.

Example: Community Climate Adaptation Planning Programme

The Climate Change Response business unit supports teams across the Council to apply climate considerations to their work, helping the Council deliver this 2024 Long-term Plan strategic approach.

Examples: Insights and analysis, policy and strategy advice, training and capability delivery

Poneke, the creative capital where people and nature thrive.
