

[Upper Stebbings Valley Landscape and Ecology Analysis](#), Boffa Miskell, July 2018 identifies areas 4 and 10 as the Johnsonville and Glenside ridgetops. It is this ridgetop that has been identified in the PDP as the 'Ridgetop area'.

Below are maps which compare the ODP ridgelines and hilltops (dotted line) with the Boffa Miskell ridgetop and slope analysis.

Below is a map which compares the Boffa Miskell ridgetop and slope analysis with the notified Upper Stebbings Development Plan.

Below is a map which compares the Boffa Miskell ridgetop and slope analysis with the recommended Glenside West Development Plan. Note: the Glenside West Development Plan below does not show the recommended LLRZ surrounding the western cul-de-sac as recommended in my supplementary evidence. This LLRZ does not extend into the Ridgetop area (Area 10 ridgeline below).
